RE: RTP Application for the City of Thomasville

Dear Ms. Davis,

On behalf of the City of Thomasville, I have enclosed a pre-application for RTP funding for construction of a walking track at the Thomasville Community Playground. Your consideration of and assistance with this project is appreciated.

If you have any questions or need any additional information, please do not hesitate to call.

Thank you,

Sheldon Day
Mayor

FY2017-18 RECREATIONAL TRAILS PROGRAM

PRE-APPLICATION FORM

DEADLINE: NOON, FRIDAY, January 6, 2017

Applicant's Name (Organization): City of Thomasville

Address: PO Box 127

Thomasville, AL

ZIP:36784

County: Clarke

FEI Number: 63-6001375

DUNS Number: 969005842

Project Title (6 words max): Thomasville Community Playground Trail

Project Description (25 words max):

Construction of a 10' wide 1,200 linear foot walking trail at the Thomasville Community Playground.

Park Name, if applicable: Thomasville Community Playground

Park Address: 1251 Kimbrell Street

Thomasville, AL

ZIP:36784

GPS Coordinates of Project
(in degrees):

31°55'36.41"N 87°44'29.23" W

Project Descriptive Narrative

Provide a brief, yet informative, description of the proposed project; address each evaluation criterion on the following pages (provide additional narrative and documents as may be needed to support your response to each evaluation criterion); and include a cost estimate, a preliminary site plan, plat and/or legal description, and location map.

Project Information

Name of Project: Thomasville Community Playground Trail

Trail Length in Linear Feet (L.F.): 1,200 Trail Width: 10'

Trail Surface Type: asphalt (with concrete in areas where equipment can cross it)

Application Type: ☒ Non-motorized for a Single Use ☐ Motorized
☐ Non-motorized for Diverse Use ☐ Educational

Type of Applicant: ☒ City/Town ☐ County
☐ State ☐ Private Organization

Total Estimated Project Cost	\$ 76,230
Grant Amount Requested	\$ 60,984
Total Local Match	\$ 15,246
Cash Match	\$ 15,246
In-Kind Match	\$ 0
Donation	\$ 0

Brief Description of the Project:

The City of Thomasville proposes to construct a 10' wide, 1,200 linear foot walking trail at the Thomasville Community Playground. The trail will encircle the playground allowing individuals the opportunity to exercise while their children play. The trail will be a firm, level surface which will promote its use by the elderly and mobility impaired. The trail's service area includes portions of three counties in rural southwest Alabama.

1. Describe the degree to which the project's scope and feasibility meet the project area's recreational needs.

The addition of a walking trail at the Community Playground site is the next step in the City of Thomasville providing a "top of the line" recreation experience that will attract persons of every age. The Thomasville Community Playground project was a community based effort that culminated in the construction of the present playground. All funding was from private donations by Thomasville citizens and businesses. Money was raised through fundraisers including allowing residents to buy pickets in the fence that encloses the playground area and the sale of community playground t-shirts. The playground is heavily used by residents of a three county area.

Currently, there are only seating areas for parents to rest while their children play. A number of individuals have contacted the city regarding the need of a walking trail on-site. The addition of the trail would provide adults an opportunity to exercise while their children play on the playground. This would create a win-win situation where both children and adults could exercise concurrently.

The City of Thomasville currently offers a walking trail at Gates Drive Park. The trail at Gates Drive is narrower and much longer than the proposed trail. There are also a number of grade changes along its path making it a more strenuous route for many. The proposed trail will be a shorter, more level loop which will provide a better option for the elderly and mobility impaired.

Additionally the trail at the playground is needed due to the heavy use of the Gates Drive Park, especially during the spring and fall. City league sports take over the park and many individuals prefer not exercise on the trail when the park is crowded and ballgames are being played. During baseball season all three baseball fields are in use every evening, which creates an environment in which many older individuals do not feel secure. The amount of traffic at the park during these times is also a deterrent for many.

Walking trails are ranked 5th in Region 6 in the 2013-2018 SCORP data. Parks, pools, playgrounds, and baseball fields rank higher. The City of Thomasville already provides these services to its residents. An additional walking trail is the city's top priority at this time.

Attachment #1 provides photographs of the project area.

2. Describe the ways in which the project provides for the greatest number of compatible recreational purposes.

The Community Playground provides a wonderful opportunity for the city to provide the combination of children's recreation and adult recreation at one site. The current facilities as Gates Drive offer a walking trail but the park does not offer a full

playground. The layout of the playground facilitates its use by families and the elderly. Mothers can bring their children to the playground and walk the trail while having their children in sight the entire time. The fence encircling the entire site adds to this sense of security.

The level surface and smaller loop promotes its use with the elderly and mobility impaired. These groups are less likely to use the trail at Gates Drive due to its topography. The number of people using the facilities at Gates Drive during city-league recreation also serves as a deterrent. The proposed trail will provide these individuals an opportunity they do not presently have.

Another positive aspect of the expansion of the park is its proximity to the city's golf course and pool facility.

3. Describe the ways in which the project provides a new, unique, or more effective means for making trail opportunities available to the public.

The proposed walking trail will provide a new opportunity for parents to exercise while their children play at the Thomasville Community Playground. The entire area is enclosed by a fence providing safety for both the parents and children.

4. Describe the ways in which the project facilitates the access and use of trails by persons with disabilities, older citizens, economically disadvantaged, and other special populations or groups.

The proposed walking trail facilitates access and use of trails to a variety of groups and individuals:

- The proposed track will be 10' wide and fully handicap accessible. The children's playground onsite is also handicap accessible. The City's other walking track at Gates Drive is a much longer, more narrow track with areas where the change in grade make it difficult for individuals with mobility issues to navigate.
- The location of the track will provide additional opportunities to economically disadvantaged populations. Attachment #2 provides data to demonstrate that the service area is economically distressed. The service area lies in the area of the state with the highest unemployment rates and percentage of children in poverty. Many track users live in areas where no track or even sidewalk is available for exercise. The track's service area is in a region of the state where obesity and obesity related illnesses occur at a higher than average rate. Attachment #3 shows data supporting this statement.
- Currently a number of entities use the Community Playground on a regular basis. These groups include the Thomasville City Schools and the Boys and Girls Club of Southwest Alabama. The addition of the track will provide an additional recreational opportunity to these children, of which the majority are low- income.

- 5. Describe the ways in which the project creates opportunities for new partnerships between trail users, private interests, and public agencies within the project area.**

The Community Playground has become a centerpiece of the Thomasville community. Residents take great pride in the fact that they helped finance and construct the facilities. There is a true feeling of ownership with many residents and they continue to volunteer with the upkeep of the park. The addition of the walking track at the park will create even more opportunities for partnerships between local groups and public agencies.

- 6. Describe the ways in which the project uses the grant funds to leverage other public or private investments (in the form of services and materials as well as dollars).**

The Community Playground project has brought the community together from its inception. Numerous businesses donated money to the construction of the playground. The city has pledged to build pavilions at the park if funding for the walking track is received. The city feels that as individuals and businesses see the park expand additional opportunities for donations and in-kind services will flourish.

- 7. Describe the degree of commitment to continue operation and maintenance of the project. Include an operation and maintenance plan detailing the amount of money needed to operate and maintain the trail after it is completed and identify who will be responsible for the work.**

The City of Thomasville is committed to the maintenance of the proposed walking track. One can look at the city's parks and quickly see they are committed to providing well-maintained facilities for the public's use. The city employs a professional recreation director to oversee its recreation facilities. In addition to the director, the recreation department has two full time and one part time employee that help with maintenance and upkeep of facilities. The city presently owns all equipment necessary to maintain the proposed improvements.

The city's 2016-2017 budget provides for \$20,000 a year in park maintenance. It should be noted that this figure is separate from the maintenance figure for ballfields (\$22,000) and buildings (\$8,000). There is an additional \$15,000 budgeted for repair of tractors and lawn mowers.

- 8. The degree to which community involvement is addressed: i.e., (A) Project idea originated with trail users or a community group that has substantial knowledge, and (B) The private sector (including individual citizens, community groups, or local business enterprises) has participated in the**

development of the proposed idea and has made commitments of labor, money, or materials to support proposed implementation.

The Thomasville Community Playground Project was a community driven project. The community raised money to go towards the purchase of the playground equipment. The playground was also built by volunteers from the community. This initial project was a massive public effort to provide a much needed playground for the children of Thomasville. The idea for a walking track at the park is also a community born idea. Numerous individuals have contacted the city about adding a track to the facility. Many parents would like the opportunity to exercise while their children play.

The city has received support letters from a number of groups that use the track on a regular basis, these are provided as Attachment #4. The City of Thomasville has also provided a letter detailing why they feel the trail is necessary and their commitment to the project.

9. Describe in detail how the trail will be managed. Include discussion on season length, hours of operation, limitations on use, enforcement provisions, and scheduling.

The City of Thomasville will continue to manage the park after the walking track is constructed. The park is publicly owned and open for all to use throughout the year. The city has installed a fence around the park for safety and security reasons. The proposed walking trail will be limited to nonmotorized use only. The park is open from dawn to dusk and is regularly patrolled by the Thomasville PD. Recreation department staff also visit the park daily.

All special events will be scheduled through the city's recreation department.

10. Identify and describe the service area of the project. Approximately how many people do you propose to serve with this project? Identify other trail resources in the service area by trail type (motorized, non-motorized, multi-use), distance, location in relation to the proposed trail, and ownership.

The service area for the proposed walking track is extensive due to Thomasville being a hub city in southwest Alabama. The Community Playground attracts individuals from Fulton, Thomasville, west Wilcox, and south Marengo counties. The park's playground is by far this nicest in the area. The proposed trail will encircle the playground providing parents the opportunity to exercise while their children play. The population of the estimated service area of the track is 13,149.

The following walking tracks/trails are available in the service area:

- Gates Drive- The City of Thomasville's Gates Drive Park has a nonmotorized track that is approximately 0.5 mile in length. The track encircles three of the

city's baseball fields. Gates Drive Park is approximately 3 miles from the proposed track.

- Pine Hill Town Park- The Town of Pine Hill has a 2,640 linear foot nonmotorized track at its municipal park. This facility is approximately 12 miles from the proposed track.
- SAEDA Walking Track- The SAEDA nonmotorized track is a 1,110 linear foot walking track in Dixon Mills. This facility is approximately 10 miles from the proposed track.

11. Identify the length of time the trail will be maintained and open and available to the public and identify the method to be used to ensure this commitment (deed covenant, deed restriction, etc.).

The park is open year round for the public's use. The city pledges to maintain the area year round. The City of Thomasville is committed to the land being held for recreation in perpetuity. The city is willing to add this stipulation to the deed for the property.

12. The Universal Trail Assessment Process (UTAP) and the High Efficiency Trail Assessment Process (HETAP) are methods of obtaining and recording objective data related to outdoor, natural environments. They are tools that land managers, agencies, and individuals can utilize to learn about, monitor, improve, and encourage the safe and enjoyable use of any outdoor path of travel. Points are available to project sponsors committing to the assessment of the trail and installation of Trail Access Information signage.

The City of Thomasville is willing to participate in the trail assessment process but is dependent on the equipment to perform the assessment and a trained assessor being available in the area.

Total Project Cost: \$76,230.00 Funds Requested: \$60,984.00

Important Note: The maximum grant amount by trail type is **\$70,000.00** for non-motorized, single-use trails; **\$200,000.00** for non-motorized, diverse-use trails; **\$500,000.00** for motorized trails, or **\$87,489.00** for education projects.

Ref: Walking Trail Grant

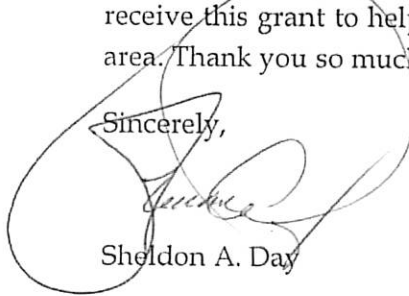

The Thomasville City Council has unanimously voted to support the Recreation Trail Grant for our children's park. This park is utilized by a tremendous number of residents in Thomasville and surrounding counties. The City of Thomasville is located in the center of a very large rural area. This rural area has virtually zero public sidewalks or walking trails available. Many people from Marengo and Wilcox Counties come to Thomasville so they can have access to sidewalks and safe places to walk.

Our children's park is a popular place for visitors from adjacent counties for the same reason. Children from our rural region do not have access to adequate park facilities so they travel from a 10-15 mile radius to Thomasville. Adding a walking trail to this park will provide greater availability for adults and children alike with safe places to walk. Naturally, the addition of the trail will foster exercise, thus creating healthier options for the folks from a 3 county area. Many folks from this region want to walk and exercise more but they simply do not have access to well designed, safe walking trails.

If funded, the City of Thomasville will match the grant and we also pledge to build the pavilions and other facilities to compliment the walking trail and park.

The City of Thomasville, we, consider ourselves as partners with our neighboring rural areas and work closely to enhance opportunities for citizens in the entire region. It is our hope to receive this grant to help us once again give access to needed walking trails in this vastly rural area. Thank you so much for your consideration.

Sincerely,

Sheldon A. Day

Mayor

Re: City of Thomasville
Walking Trail Grant

To Whom It May Concern:

I am writing this letter as a show of support for the Walking Trail Grant submitted by the City of Thomasville.

There are several reasons I support Thomasville's grant application for a walking trail. This will certainly enhance the quality of life for all citizens who use the trail. In fact, The City of Thomasville has tremendous regional reach and routinely attracts citizens in to town from neighboring Marengo and Wilcox Counties. Of course, there is a large contingent of Clarke County citizens that would also enjoy and benefit from a walking trail. In addition to enhancing quality of life, a walking trail in Thomasville would be ideally located and provide a safe means of recreation for families.

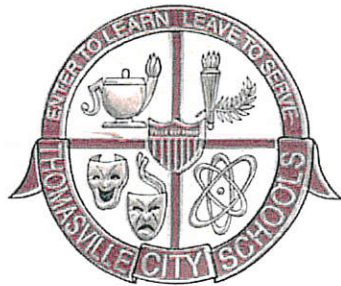

A walking trail in Thomasville would be an excellent investment in Southwest Alabama and a wonderful tool to enhance the lives of many citizens.

I appreciate your consideration of this grant application.

Sincerely,

Jesse W. Quillen
Executive Director

OFFICE OF THE SUPERINTENDENT

THOMASVILLE CITY SCHOOLS

750 GATES DRIVE
POST OFFICE BOX 458
THOMASVILLE, ALABAMA 36784-0458

January 4, 2017

TELEPHONE: (334) 636-9955
FAX : (334) 636-4096

To Whom It May Concern:

The Thomasville City Board of Education and the Thomasville City Schools strongly support a Recreation Trail Grant for the City of Thomasville. A grant such as this would greatly enhance the development of a walking trail in conjunction with Thomasville Children's Park. The park has already helped encourage outdoor physical activity for our students and has become a popular site for our parents and students. In fact, many surrounding communities utilize the site as well. A walking trail would most certainly increase outdoor physical activity opportunities for our community and the surrounding communities.

The research clearly shows children need more opportunities for outdoor physical activity in order to develop life-long healthy lifestyle choices. A walking trail in conjunction with the currently existing Children's Park would provide physical activity options for our rural community and increase outdoor physical activity for both adults and children alike.

The City of Thomasville has made a commitment to match the grant and to build the facilities necessary to enhance a quality walking trail. This commitment along with the grant would help provide a desperately needed walking trail in our rural area where such an outdoor site does not exist.

We are hopeful to receive this grant in order to provide access to greatly needed safe and quality walking trails. Thank you for considering our rural community for this grant.

Sincerely,

Vic Noel Adkison, Ed.D.
Superintendent

December 22, 2016

To whom it may concern

Ref: Walking Trail Grant

The Thomasville Chamber of Commerce and its board of directors strongly support the application for a grant for a walking trail at the Thomasville Children's Park.

Thomasville is centrally located in a larger rural area that serves more than just Clarke County but parts of Wilcox and Marengo Counties as well. There is limited access to walking areas in our rural counties and several individuals from the surrounding areas come to Thomasville for a safe location to exercise.

Our local children's park is a popular place for visitors to attend and adding a walking trail to this park will provide a safe way to exercise and enjoy the outdoors for adults and children alike.

We like to partner with our surrounding rural areas to enhance the quality of life for our citizens. Receiving this grant will do just that and provide a much needed addition to our community. Thank you in advance for your consideration.

Sincerely,

Amy Prescott
Executive Director
Thomasville Alabama Chamber of Commerce

**City of Thomasville
Recreational Trail Program (RTP) Resolution**

WHEREAS, the City of Thomasville proposes to construct a recreational trail at the Thomasville Community Playground;

WHEREAS, the City of Thomasville intends to submit an application to the Alabama Department of Economic and Community Affairs (ADECA) for grant assistance to develop the trail from the Recreational Trails Program (RTP); and

WHEREAS, the said program is limited to funding eighty percent (80%) of a project's cost;

WHEREAS, the proposed project's cost is estimated at \$76,230, which will be used to construct the trail; and

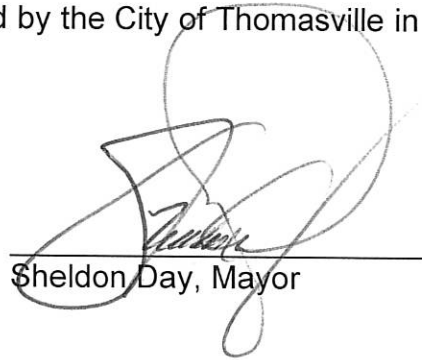

NOW THEREFORE BE IT RESOLVED, that the City of Thomasville City Council authorizes Mayor Sheldon Day to sign and submit an application along with any additional necessary paperwork to the RTP Program requesting assistance in the amount of \$60,984.00;

BE IT FURTHER RESOLVED, that the City of Thomasville pledges the remaining cost of \$15,246.00 of the proposed project cost with cash for the purpose of matching the RTP assistance; and

BE IT FURTHER RESOLVED, that in the event a grant is awarded, the City of Thomasville pledges to maintain the trail year round; and

BE IT FURTHER RESOLVED, that in the event a grant is awarded, the City of Thomasville understands that it will sign assurances to comply with all applicable Federal and State laws, rules, and regulations

This resolution is hereby passed and approved by the City of Thomasville in official session on this the 12th of December 2016.

Legal Description "As Surveyed"

"Baseball Park" lot as shown on "Map of Choctaw Heights Addition to Thomasville, Alabama. Foster Estate" as recorded in Map Book 1 Page 10 in Probate Records of Clarke County.

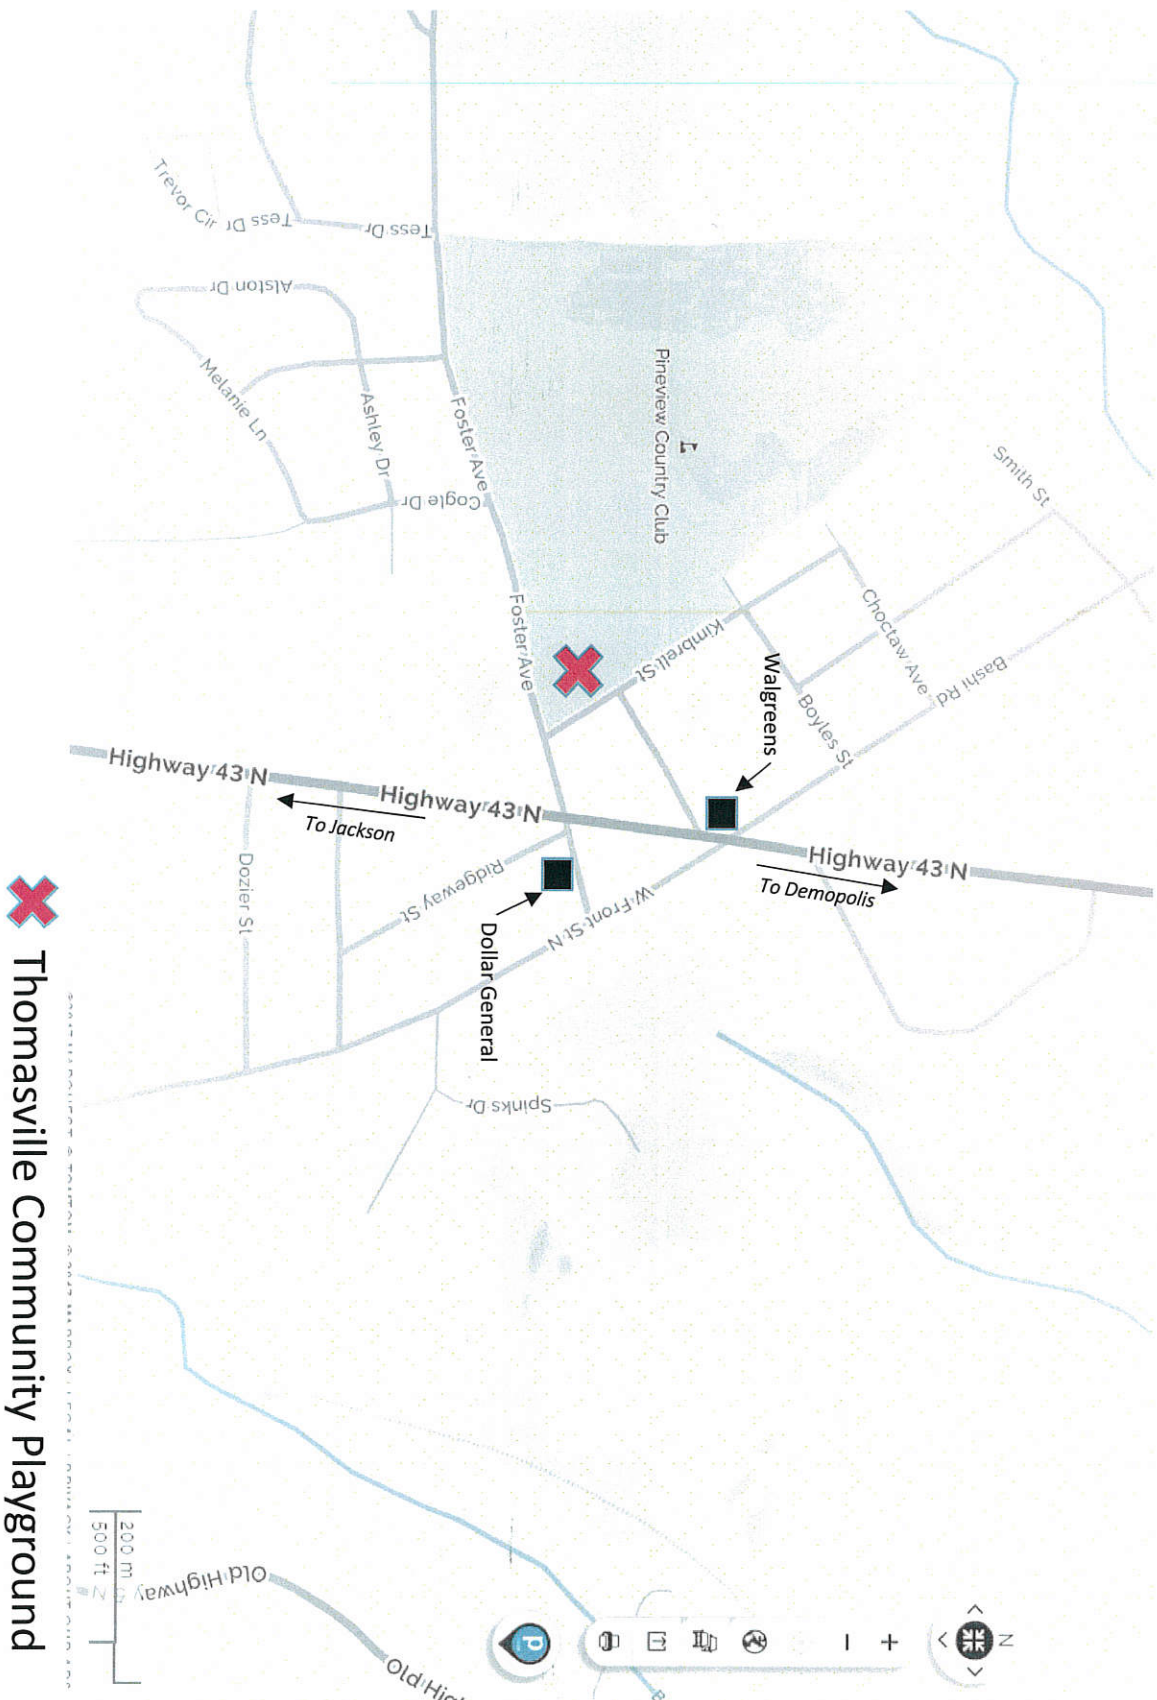

More particularly described as:

Begin at a found iron marking the NW corner of the "Baseball Park" lot as shown on "Map of Choctaw Heights Addition to Thomasville, Alabama. Foster Estate" as recorded in Map Book 1 Page 10 in Probate Records of Clarke County;
Thence From P.O.B. North $76^{\circ} 04' 42''$ East a distance of 358.10 feet to a found iron;
Thence South $29^{\circ} 17' 03''$ East a distance of 356.42 feet to a point on the North Right
of Way of "Foster Avenue". Said point on a circular curve concave to the Northwest
and having a radius of 8,283.04 feet and a Chord bearing of South $79^{\circ} 02' 45''$ West
(363.76' Long Chord);
Thence run along the arc of said circular curve through a central angle of $2^{\circ} 30' 59''$
for a distance of 363.79 feet to a set capped rebar(JACKSON CA 0646);
Thence leaving said ROW North $29^{\circ} 17' 03''$ West a distance of 336.89 feet to the P.O.B.

Containing 2.76 acres, more or less.
